

## Expert Assistance to Create a Safe and Effective Learning Environment

The risks posed by the COVID-19 pandemic require schools to continually reassess every aspect of campus life to ensure they can provide a safe, healthy environment and still deliver their unique brand of academic and life experiences. Fusion Cell's team of board-certified public health epidemiologists and logistics experts can help you adapt to this changing environment. We bring decades of experience managing pandemics and disease outbreaks, and we partner with your existing COVID-19 planning team to develop, implement, and maintain your COVID safety plan. With our expertise, you can confidently execute your mission of enriching the lives of your students.

### Custom Guidance Backed by a Science-Based Approach to COVID-19 Safety

Fusion Cell's risk mitigation experts apply a science-based approach that helps schools reduce transmission risk. Our experts help you keep students, faculty, and staff on campus at the highest possible safety, academic, and quality-of-life levels. We partner with your own COVID-19 response team and help you:

- Assess and manage your unique COVID-19 risks
- Understand and apply relevant federal, state, local and regional requirements
- Make strategic and tactical decisions to adapt to changing regulations and conditions
- Create, implement, and maintain a COVID-19 safety plan

### Know Where to Focus, How to Adapt

Information on COVID-19 and how to combat it is regularly changing. This causes confusion and concern in the entire school community. Our experts can help you process new guidance, focus resources on leverage points, quickly respond to changing conditions, and communicate with students, parents, faculty, and staff.

### Schedule a Discovery Session

To learn how we can help you, schedule a discovery session with our public health and logistic experts.

### Military-Trained Experts in Infection Control

Fusion Cell's staff consists of current and former US military specialists with decades of experience at maximizing operations in the face of pandemics and disasters. Our team includes:

- Experts in hospital infection control, experienced with COVID-19, Ebola, H1N1, SARS
- Epidemiologists with Certified in Public Health (CPH) credentials
- Experts in designing and exercising annual disease containment plans for military bases
- Experience with CDC, WHO, HHS, OSHA, FEMA, FDA, human resource, and other procedures

### Create, Implement and Adapt Plans

Our experts provide guidance at every stage of the COVID-19 preparedness planning and can help you:

- Create a back-to-school plan from scratch
- Optimize existing plans and operating procedures to improve compliance, safety, efficiency and performance
- Implement a plan by determining how to modify your current facilities and operating procedures
- Adapt plans that are already in place when conditions and state, local and federal guidelines change

### Safety for All Aspects of Campus Life

We help you maintain an operating plan for:

- **Academic services:** classrooms, labs, libraries, counseling
- **Facilities and services:** cleaning, HVAC, food
- **Flow:** drop-off/pickup, class changes, lunch, breaks
- **Transportation**
- **Sports, arts, clubs, and activities**
- **Residential life:** housing, visitors, religious services
- **Protocols for students, faculty, staff, visitors, and vendors**
- **Quarantine and isolation facilities and procedures**
